Frequently Asked Questions (FAQ)

Debit Card-i Maintenance via Internet Banking

No	Terms	Definitions
1	Card Not Present (CNP)	A Card-Not-Present (CNP) is a transaction effected without physically presenting the VISA Debit Card-i at the point of sale such as E-Commerce (online), direct debit and Mail Order and Telephone Order (MOTO) transactions
2	Card Terminal	A device that links with payment cards to make electronic payments or funds transfers. The terminal is a means of capturing information from payment cards and consists of a secure keypad for entering a PIN, a screen and a network connection to access the payment network for authorization.
3	Contact	Contact transactions are when the chip of the card communicates with the payment device or terminal through a direct physical connection, for example, the card is inserted into a terminal.
4	Contactless	Contactless transactions use short-range wireless technology to securely complete payments between a contactless card or payment-enabled device and a contactless-enabled card reader.
5	GO Secure	GO Secure is a digital authentication method to approve transactions initiated at Internet Banking using secure verification. This feature shall replace the SMS-based i-Access Code (iAC), wherever possible, and is available on GO by Bank Islam mobile application.

No	Question	Answer
