### 1.9 Valuation of Allocated Asset

The returns on this investment account will be affected by the performance of the allocated assets including, but not limited to, the quality of assets (i.e. impairment) and movement of Effective Profit Rate (EPR) in relation to financing assets that are priced based on floating rate methods etc. The principal and returns are not guaranteed and an IAH may be exposed to a risk of no returns at all. The majority of the House and Fixed Asset Financing Portfolio has a maturity of more than 15 years. This will ensure stability in the profit stream of the HFA portfolio which can then benefit the investment return expectations, especially for long-term IAH.

**4.0 ECONOMIC REVIEW AND PROSPECT**

The global economy prospect continues to be challenging amidst heightened uncertainties over COVID-19 pandemic impacts which have girdled the globe since end of last year. Apart from that, business sentiments have also been deteriorating. This was reflected from the J.P. Morgan Global Composite Output Index which has contracted (June: 47.8 points vs. May: 42.4 points) for the fifth straight month, suggesting poor performance in the private sector economic activities. On the domestic front, the Industrial Production Index (IPI) slumped by 10.6% in the first five months of 2020 as compared to 3.2% growth in the same period last year. Similarly, total exports plunged by 9.7% in 5M2020, extending a 0.2% fall in the same corresponding period in 2019. As such, Malaysia's GDP growth is expected to register a negative growth of 7.0% and 2.8% in 2Q2020 and 3Q2020 respectively before recovering to 2.7% in the final quarter this year.

**5.0 PROPERTY MARKET AND HOUSE AND FIXED ASSET PORTFOLIO REVIEW**

According to data published by the National Property Information Centre's (NAPIC), during Q12020, property market sector recorded 72,908 transactions worth RM28.64bill, down by 13.6% in volume and 22.9% in value as compared to Q12019 (84,388;RM37.16bill). The residential segment remains the mainstay of the property market with 64.5% of total transaction. The residential sub-sector's market recorded 47,045 transactions worth RM15.62bill, down by 9.9% in volume and 14.3% in value as compared to Q12019 (52,203;RM18.23bill). By price range, demand continued to focus on properties worth RM300,000 and below. The residential overhang and unsold situation took an upturn. There were recorded 29,698 units worth RM18.91bill, decreased by 9.8% in volume and 5.3% in value against Q12019 (32,936;RM19.96bill). Of the total, Johor, Perak & Selangor recorded top states with residential overhang. The property market performance especially residential subsector will continue to be affected by affordability and overhang issues and also slowing economy.

Bank Islam's Housing and Fixed Asset (HFA) portfolio stood at RM20.96bill in June, increasing by 0.92% month-on-month (m-o-m) from RM20.77bill in the preceding month. On the quarterly basis, HFA portfolio rose by 1.88% quarter-on-quarter (q-o-q), growing from RM20.58bill in 1Q2020 to RM20.96bill in 2Q2020. The Gross Impairment Ratio (GIR) continues to improve further from 0.73% in May to 0.69% in June. This was lower compared to 1.14% at the industry level as of May 2020. Be that as it may, Bank Islam will continue to be attentive in extending HFA financing following the external factors such as residential property glut and affordability issues.
