MFRS 9 includes revised guidance on the classification and measurement of financial instruments, including a new expected credit loss model for calculating impairment on financial assets, and the new general hedge accounting requirements. 31. Fair value of financial instruments

Fair value hierarchy

MFRS 7 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources and unobservable inputs reflect the Group's market assumptions. The fair value hierarchy is as follows:

- Level 1 – Quoted price (unadjusted) in active markets for the identical assets or liabilities. This level includes listed equity securities and debt instruments.
- Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices). This level includes profit rates swap and structured debt. The sources of input parameters include Bank Negara Malaysia (BNM) indicative yields or counterparty credit risk.
- Level 3 – Inputs for asset or liability that are not based on observable market data (unobservable inputs). This level includes equity instruments and debt instruments with significant unobservable components.

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy for financial instruments measured at fair value. It does not include short-term/on demand financial assets and financial liabilities where the carrying amount is a reasonable approximation of their fair value:

Unobservable inputs used in measuring fair value

The following tables show the valuation techniques used in the determination of fair values within Level 3, as well as the key unobservable inputs used in the valuation models.

(a) Financial instruments carried at fair value

Type	Valuation technique	Significant unobservable inputs	Inter-relationship between significant unobservable inputs and fair value measurement
Financial assets available-for-sale	Valued at cost less impairment	Not applicable	Not applicable

(b) Financial instruments not carried at fair value

The following methods and assumptions are used to estimate the fair values of the following classes of financial instruments:

(i) Financial investments held-to-maturity (“HTM”)

The fair values of securities that are actively traded is determined by quoted bid prices. For non-actively traded securities, the fair values are valued at cost less impairment or estimated using discounted cash flows analysis. Where discounted cash flows technique is used, the estimated future cash flows are discounted using applicable prevailing market or indicative rates of similar instruments at the reporting date.

(ii) Financing and advances

The fair values of variable rate financing are estimated to approximate their carrying values. For fixed rate financing, the fair values are estimated based on expected future cash flows of contractual instalment payments, discounted at applicable and prevailing rates at reporting date offered for similar facilities to new borrowers with similar credit profiles. In respect of impaired financing, the fair values are deemed to approximate the carrying values which are net of impairment allowances.

34. Performance review for the six months ended 30 June 2015

The Group reported profit before zakat and tax of RM350.3 million for the six months ended 30 June 2015. This represents a 4.5% increase compared to the previous corresponding period. The improved performance was mainly attributed to growth in business activities.

Year-on-year net financing assets grew by RM4.9 billion or 18.5% to reach RM31.1 billion as at end June 2015. Correspondingly, fund based income from financing also increased by RM149.4 million or 19.9%. Non fund based income also reported a 1.2% growth or RM1.7 million.

As at end of June 2015, customer deposits stood at RM43.3 billion with a year-on-year increase of RM5.1 billion or 13.5%, and the low cost current and savings accounts (CASA) also reported a year-on-year increase of RM0.7 billion or 5.2%. The CASA ratio as at end June 2015 stood at 33.8% compared to end June 2014 at 36.5%. The Islamic Banking Industry CASA ratio was 24.0% as at end May 2015.

The Group's gross impaired financing ratio increased from 1.14% as at end December 2014 to 1.18% as at end June 2015. The net impaired financing ratio (less IA and CA) also reduced to a negative 0.81% as at end June 2015 whilst the net impaired financing ratio (less IA only) was 0.76%. The Banking System gross impaired ratio was 1.59% and the net impaired ratios were -0.01% (less IA and CA) and 1.20% (less IA only) as at end May 2015.

The key performance ratios as at end June 2015 also compared favourably against the Banking System ratio as at end December 2014. The Bank's pre-tax return on equity was 17.8% against the Banking System's 15.2%. The pre-tax return on assets was 1.5% against the Banking System's 1.5%. However, the Risk Weighted Capital Adequacy ratio was 14.3% compared to the Banking System's 15.9% as at end December 2014 in view of the continued growth in financing.

35. Prospect for 2015

The Malaysian economy recorded 5.6% y-o-y growth in the 1Q2015 GDP but may contract slightly below 5.6% in 2Q2015. Lower domestic consumption arising from deteriorating consumer sentiment, higher inflation and the continuous conservative lending by banks to avoid households in the vulnerable income segment group, is anticipated to drag down the growth. Consumers are likely to be mindful of their spending habit and would prioritise them based on the necessities. Despite these challenges, the Bank foresees that BNM would be inclined to keep the Overnight Policy Rate (OPR) unchanged at 3.25% for the rest of 2015 to sustain the economic expansion. Nevertheless, economic growth is expected to be supported by expansionary monetary policies in key economies such as China, Eurozone, Japan as well as the ASEAN member countries. In addition, the announcement of 11th Malaysia Plan (11MP) in May is expected to have positive effect to the economy during the plan period (2016-2020). All in all for 2015, GDP is expected to expand by 5.3% in view of continuous growth prospect in the 2H2015 following monetary easing enacted by the major central banks. As for currency, the MYR/USD is expected to remain weak between RM3.55 and RM3.85 per US dollar.

In light of the weaker economic conditions, the banking industry outlook is envisaged to be challenging for the rest of the year. The industry loan growth is expected to decelerate further to between 7% and 8% for 2015, lower than the 9.3% recorded in 2014. The factors that could weigh on loan growth this year include: (1) intensifying competition especially on the funding front as banks rush to meet the new Liquidity Coverage Ratio (LCR) requirements that came into force in June 2015; and (2) stringent credit evaluation given the new BNM ruling on restructured and rescheduled loans that affords banks less flexibility to reschedule customers' repayments. Similarly, business loan growth is also projected to slow down on the back of weaker economic circumstances particularly lower commodity prices and domestic currency. The Bank foresees deposit rates to remain high going forward while the lending yields would continue to contract, resulting in further compression in the banks' margin. Banks will also be focusing on cost containment as one of the key priorities as top line growth remains a challenge. For Islamic banking, financing growth is still expected to record a double digit growth albeit at a slower pace than the previous year. The evolving role of Islamic banks is also evident in 2015. As part of Islamic Financial Services Act (IFSA) 2013 requirements, all deposits accepted under the Mudharabah and Wakalah concepts are now classified as Investment Account (IA) and no longer under the deposit effective from June 2015. The IA framework is now seen by many, as a catalyst for Islamic banks to move towards "risk sharing" product offerings in line with the true spirit of Islamic finance. It is expected that the development of more IA products will give a competitive edge to Islamic finance and aid the expansion of Islamic banking assets in the future.

The Bank plans to sustain growth despite the challenges surrounding the economy. The Bank will continue to focus on CASA gathering efforts, retain good and acquire new clients with continued emphasis on service delivery and product innovation. To maintain asset quality, the Bank continuously exercise robust credit management and vigilant underwriting standards. Other key focus would be driving cost-income-ratio down through cost-cutting initiatives. Driving efficiency of capital management is also crucial, one of which is through the implementation of IA. The new IA framework allows Islamic banks to benefit from capital relief for the underlying assets and exemption from Eligible Liabilities (EL) for Statutory Requirement Reserve (SRR) calculation required by BNM. The introduction of IA can potentially expand product offerings, offer opportunity to gain new source of income and expand the role of Islamic banks from credit provider to investment intermediary as advocated by BNM. Moving forward, the Bank intends to continuously leverage on its strength as the pioneer Islamic bank in the country as seen previously when it took the lead to launch the very first Shariah-compliant Restricted Investment Account ("RIA") and become one of the four founding financial institutions to spearhead the Shariah-based Investment Account Platform ("IAP").
