32. Fair value of Financial Instruments

Fair value hierarchy

MFRS 7 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources and unobservable inputs reflect the Group's market assumptions. The fair value hierarchy is as follows:

- Level 1 – Quoted price (unadjusted) in active markets for the identical assets or liabilities. This level includes listed equity securities, listed Sukuk and listed debt instruments.
- Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices). This level includes profit rates swap, Sukuk, debt instruments and structured debts. The sources of input parameters include Bank Negara Malaysia (BNM) indicative yields or counterparty credit risk.
- Level 3 – Inputs for asset or liability that are not based on observable market data (unobservable inputs). This level includes equity instruments and debt instruments with significant unobservable components.

The table below analyses financial instruments carried at fair value and those not carried at fair value for which fair value is disclosed, together with their fair values and carrying amounts shown in the statement of financial position. The table does not include those short term/on demand financial assets and financial liabilities where the carrying amounts are reasonable approximation of their fair values.

Fair value hierarchy (continued)

Unobservable inputs used in measuring fair value

The following tables show the valuation techniques used in the determination of fair values within Level 3, as well as the key unobservable inputs used in the valuation models.

(a) Financial instruments carried at fair value

Type	Valuation technique	Significant unobservable inputs	Inter-relationship between significant unobservable inputs and fair value measurement
Financial assets available-for-sale	Valued at cost less impairment	Not applicable	Not applicable

(b) Financial instruments not carried at fair value

The following methods and assumptions are used to estimate the fair values of the following classes of financial instruments:

(i) Financial investments held-to-maturity (“HTM”)

The fair values of securities that are actively traded is determined by quoted bid prices. For non-actively traded securities, the fair values are valued at cost less impairment or estimated using discounted cash flows analysis. Where discounted cash flows technique is used, the estimated future cash flows are discounted using applicable prevailing market or indicative rates of similar instruments at the reporting date.

(ii) Financing and advances

The fair values of variable rate financing are estimated to approximate their carrying values. For fixed rate financing, the fair values are estimated based on expected future cash flows of contractual instalment payments, discounted at applicable and prevailing rates at reporting date offered for similar facilities to new borrowers with similar credit profiles. In respect of impaired financing, the fair values are deemed to approximate the carrying values which are net of impairment allowances.

35. Performance review for the six months ended 30 June 2016

The Group reported profit for the six months ended 30 June 2016 of RM262.2 million, representing an increase of 5.9% compared to the previous corresponding period. The improved performance was mainly attributed to growth in business activities.

Year-on-year net financing assets grew RM5.2 billion or 16.8% to reach RM36.3 billion as at end June 2016. Correspondingly, fund based income from financing also increased by RM138.6 million or 15.4%. Non fund based income was also higher by RM35.3 million or 24.9% and growth was mainly from investment income.

As at end of June 2016, customer deposits and investment accounts stood at RM42.4 billion with a year-on-year decrease of RM0.9 billion or 2.2% in view of stiff competition for deposit among financial institutions in Malaysia. The low cost current and savings accounts (CASA) reported a year-on-year decrease of RM0.2 billion or 1.5%. Nevertheless, the CASA ratio as at end June 2016 was 36.9% against the Islamic Banking Industry CASA ratio of 25.0% as at end May 2016.

The Group's gross impaired financing ratio improved to 1.05% while the net impaired financing ratio (less IA and CA) was a negative 0.85% as at end June 2016 compared to 1.09% and a negative 0.83% respectively as at 31 December 2015. The Banking System gross impaired ratio was 1.65% and the net impaired ratio was 0.15% (less IA and CA) as at end May 2016.

The key performance ratios as at end June 2016 also compared favourably against the Banking System ratios as at end December 2015. The Bank's return on equity and return on assets based on profit before tax (PBT) were 16.8% and 1.5% respectively against the Banking System's 12.4% and 1.3% respectively. In addition, the Group's capital strengthened whereby the total capital ratio stood at 15.9% as at end June 2016 compared to 15.3% as at end December 2015.

36. Prospect for 2016

The economy grew by 4.2% year-on-year in the first quarter of 2016, moderating from 4.5% in the previous quarter. Growth was supported by continued increase in private consumption to 5.3% from 4.9% previously. However, it was dampened by a slowdown in private investment growth to 2.2% from 4.9% in fourth quarter of 2015 while public investment declined by 4.5% from 0.4% expansion in the previous quarter. Additionally, net exports also contracted by 12.4% in the first quarter of 2016 after recording 4.3% expansion previously.

36. Prospect for 2016 (continued)

All things considered, the economy will continue to be challenging for the rest of 2016. With factors such as low commodity prices, policy changes in major economies and slowing momentum of global growth still causing a lot of uncertainty, domestic growth remains the main engine for economic growth despite the weak consumer sentiment. GDP at this point is still expected to register growth of around 4.3% for 2016.

The banking sector in Malaysia is expected to remain resilient amidst difficult operating conditions this year. Slower economic growth, weaker external demand and lower commodity prices has dampened business and consumer sentiment. The reduction in EPF's members' contribution rate which began in March 2016 as well as decline in petrol prices in first quarter of 2016 could have instilled some positivity in terms of spending decision resulting in the slight uptick in private consumption in the period. With more infrastructure projects in the pipeline, the Bank expects that it should give some comfort to the construction sector, improving the growth prospect for private investment.

As it stands, BNM recently announced a 25-basis point reduction in the Overnight Policy Rate (OPR), bringing it down to 3.00% from 3.25%. Banking sector outlook will be subject to continued stiff competition for deposits and further margin compression as a result of reduction in base rate/ base financing rate, which will lead to lower asset yield. There could also be a gradual increase in impaired financing but it will be manageable. Moving forward, the Bank foresees that fee based income could also be under pressure with the rapid development of fintech companies. The Bank expects tightening of lending standards among the players. As such, lending growth is poised to slow down further to around 5% to 6% in 2016 (2015: 7.9%).

The Bank intends to follow through its strategic development plan that focuses on sustaining capital through robust liability management, safeguarding asset quality, and driving earnings growth mainly through strong promotion of the Bank's investment account products. Braving the challenges of 2016, cost and resource optimisation will be of paramount importance given the cautious operating outlook while Shariah-led innovation will be maintained as another core focus as this anchors the Bank's ability to continue creating its own niche. Furthermore in an extremely competitive environment, it is vital to remain customer-focused by continuously seeking to attain service excellence.
